

**Amendment to the Claims:**

The following claim listing replaces all prior versions of the claims in the application.

**Claim Listing:**

1-26.(Cancelled)

27.(Previously Presented) An electrode for a plasma display panel, comprising:

at least one bus line conductor; and

at least one pad connected with the at least one bus line conductor, the at least one pad including opposing side sections, each of the side sections having a blunted triangular shape, the side sections tapering away from an interior portion of the at least one pad,

wherein the interior portion of the at least one pad includes blunted triangular shape end portions, one of the end portions connecting with the at least one bus line conductor.

28.(Previously Presented) The electrode of claim 30, wherein the interior portion of the at least one pad is rectangular in shape.

29.(Cancelled)

30.(Previously Presented) An electrode for a plasma display panel, comprising:

at least one bus line conductor; and

at least one pad connected with the at least one bus line conductor, the at least one pad including opposing side sections, each of the side sections having a blunted triangular shape, the side sections tapering away from an interior portion of the at least one pad, wherein the at least one pad has an octagonal shape.

31.(Previously Presented) The electrode of claim 27, wherein the side sections of the at least one pad each have a portion that gradually increases in width

32.(Previously Presented) The electrode of claim 27, wherein the side sections of the at least one pad gradually increase in width.

33.(Previously Presented) The electrode of claim 27, wherein the at least one bus line conductor has a first width and the side sections have a maximum width that is greater than the first width, each of the side sections having a portion that is narrower than the maximum width and that intersects the at least one bus line conductor.

34-38.(Cancelled)
